

Energy in North Florida: Policy and Resiliency Workshop

Scott R. Koons, AICP, Executive Director,
North Central Florida
Regional Planning Council

Energy in North Florida

Energy in North Florida: Policy and Resiliency Workshop

Overview of Workshop

Energy in North Florida

Overview

- Regional Planning Councils
- Statewide Energy Resiliency Study
- Florida Energy Summit
- Online Energy Survey
- Workshop Agenda

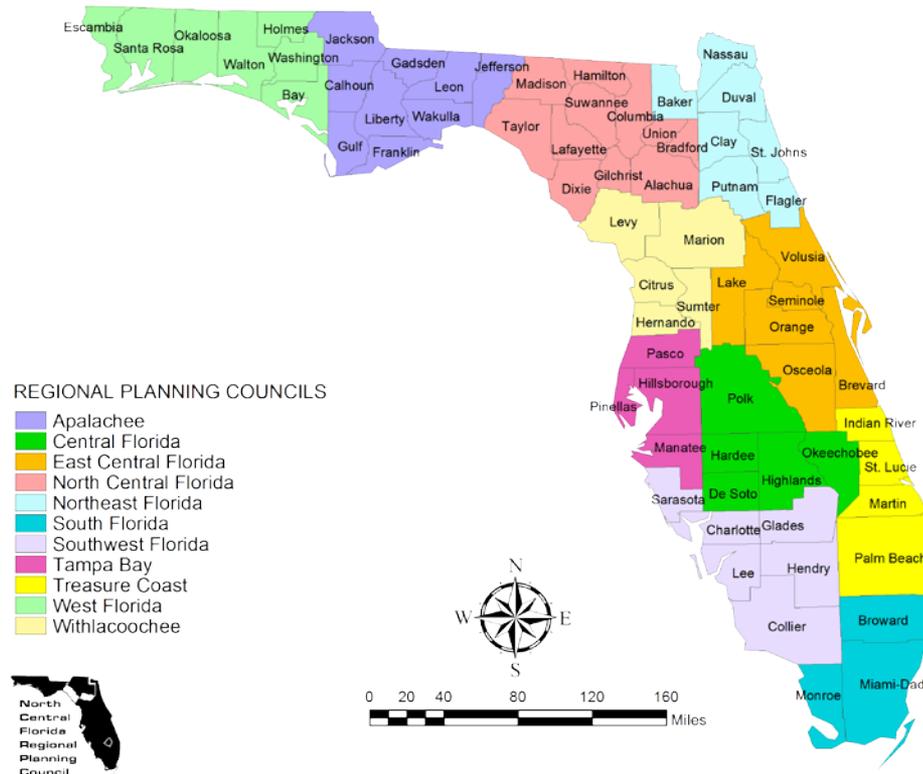

Energy in North Florida

Regional Planning Councils

Florida Regional Planning Councils

Energy in North Florida

Regional Planning Councils

Organization

- Association of **Local Governments**
- **2/3 Elected** Officials / **1/3 Gubernatorial** Appointees
- **Regional Strategies, Partnerships and Solutions**

Energy in North Florida

Regional Planning Councils

Portfolio

- Intergovernmental Solutions
- Local Government Services
- Emergency Management
- Economic Development
- Regional Visioning

Energy in North Florida

Florida Statewide Energy Resiliency Strategy Partners

- Florida Regional Planning Councils
- U.S. Economic Development Administration
- U.S. Department of Energy
- Florida Office of Energy
- Energy Stakeholders

Energy in North Florida

Florida Statewide Energy Resiliency

- U.S. Department of Commerce,
Economic Development Administration Grant
- Funding the development of a
statewide energy resiliency strategy
- Looking at both **regional and statewide issues**

Energy in North Florida

Florida Energy Resiliency Strategy Objectives

- Identifying strategies to **diversify** Florida's energy future
- Reducing **reliance** on foreign energy sources
- Increasing domestic energy usage means **domestic jobs**
- Modeling **economic impacts** of energy policies and disruptions

Energy in North Florida

Florida Energy Resiliency Strategy Objectives

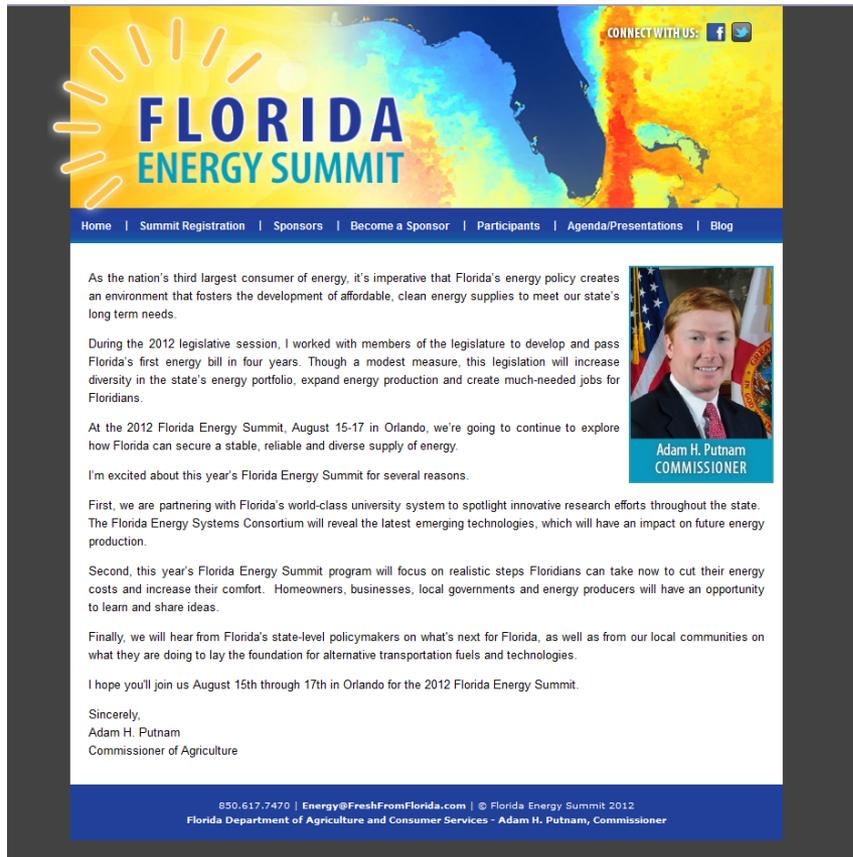

- **Regional workshops** to convene the community stakeholders to discuss solutions
- Develop **strategies** and implementation methods to make the state more resilient

As the nation's third largest consumer of energy, it's imperative that Florida's energy policy creates an environment that fosters the development of affordable, clean energy supplies to meet our state's long term needs.

During the 2012 legislative session, I worked with members of the legislature to develop and pass Florida's first energy bill in four years. Though a modest measure, this legislation will increase diversity in the state's energy portfolio, expand energy production and create much-needed jobs for Floridians.

At the 2012 Florida Energy Summit, August 15-17 in Orlando, we're going to continue to explore how Florida can secure a stable, reliable and diverse supply of energy.

I'm excited about this year's Florida Energy Summit for several reasons.

First, we are partnering with Florida's world-class university system to spotlight innovative research efforts throughout the state. The Florida Energy Systems Consortium will reveal the latest emerging technologies, which will have an impact on future energy production.

Second, this year's Florida Energy Summit program will focus on realistic steps Floridians can take now to cut their energy costs and increase their comfort. Homeowners, businesses, local governments and energy producers will have an opportunity to learn and share ideas.

Finally, we will hear from Florida's state-level policymakers on what's next for Florida, as well as from our local communities on what they are doing to lay the foundation for alternative transportation fuels and technologies.

I hope you'll join us August 15th through 17th in Orlando for the 2012 Florida Energy Summit.

Sincerely,
Adam H. Putnam
Commissioner of Agriculture

RESIDENTIAL SURVEY

BUSINESS SURVEY

Welcome to the Energy Resiliency Strategy Survey webpage

The Florida Regional Planning Councils in association with the U.S. Economic Development Administration, U.S. Department of Energy, and the Florida Office of Energy are identifying strategies to diversify Florida's energy future and reduce reliance on foreign energy sources. Increased domestic energy usage means domestic jobs.

We have created two surveys in order to understand the current energy infrastructure paradigm from both a resident and non-residential perspective. Your responses will be kept anonymous and will only be reported in summary form. The information gathered by this survey will be used to assist planners and policy makers in decision making related to Florida's future energy needs.

Energy in North Florida

Workshop Agenda

- **Presentations** on the current state of energy in North Florida, vulnerabilities and resiliency
- **Breakout Sessions** to discuss approaches for North Florida and State
- **Report Out** from Breakout Groups
- Decide what needs **follow-up** in Jacksonville Workshop, August 29, 2012

Energy in North Florida

Presentations

- **State and Federal Policies**, Ted Kury
Public Utilities Research Center, UF
- **Electricity**, Barry Moline
Florida Municipal Electric Association
- **Natural Gas**, Michael Taran
Florida Gas Transmission Company
- **Vehicle / Petroleum Fuels**, Suzanne Garner
Lewis Oil

Energy in North Florida

Presentations

- **Alternate Energy Sources and Conservation**
Lewis Walton, Gainesville Regional Utilities
- **Vulnerabilities**, Dwayne Mundy
North Central Florida Regional Planning Council
- **Resiliency**, Rita Kilpatrick
Southern Alliance for Clean Energy

Energy in North Florida

Presentations

- State and Federal Policy
