

County Profiles

I. Taylor County

A. Demographic and Land Use Analysis

1. Socio-Economic Profile

- a. **Introduction** – Population estimates and projections customarily distinguish between the *permanent resident population* in a jurisdiction (people who reside in the location year-round or at least half of the time) and the *seasonal population* (people who reside in the location only a portion of the year or who are visitors, such as tourists). The permanent resident population is further broken into those who reside in *households* (occupied housing units) and those who are in *group quarters*, such as correctional facilities, nursing homes, military quarters, group homes, etc. The decennial census and the Census Bureau's new American Community Survey (ACS) present results for the permanent resident population, but not for the seasonal population. However, both the census and the ACS present data on vacant housing units, including those that are for seasonal use. Typically, local jurisdictions use these seasonal housing unit estimates, along with hotel and motel inventories, to prepare estimates and projections of the seasonal population for planning purposes. The estimates and projections prepared by the University of Florida's Bureau of Economic and Business Research (BEBR) also refer to the permanent resident population.

Most of the data presented below is drawn from the sample portion of the 2000 Census of Population and Housing (Summary File 3) and from the 2006 ACS. The latter was tabulated only for the 40 counties that had a 2006 population of at least 65,000 permanent residents, so there is no 2006 ACS data for the 27 smallest counties in the State of Florida – in those counties, the 2006 tables will show "N.A." in all cells. Note that the annual ACS is collected for a much smaller sample than the 2000 Census, resulting in much larger margins of error. In addition, there are differences in the methodology that can affect the meaning of the data collected. As a result, comparisons should be made with caution. In some cases, although 2006 ACS data was tabulated for a county, the small sample size resulted in insufficient data to fill all of the cells in a given table – in those cases, the 2006 tables will show "N.A." in selected cells.

- b. **Overall Population** – In February 2007, BEBR estimated that the permanent resident population of Taylor County on April 1, 2006, was 21,471, up by 2,215 (11.5%) from the 2000 Census. Taylor is the 54th largest county in Florida, but it placed 48th in absolute growth in the State over that period. BEBR projects the population will reach 22,410 in 2010 and 23,436 in 2015 (Table EDR1a), which represents increases of 16% and 22%, respectively, in comparison to the 2000 Census.

- c. **Group Quarters Population** – In 2000, there were 1,231 Taylor County residents living in group quarters (6.4% of the population); 1,225 of these were institutionalized in correctional facilities, nursing homes, and juvenile institutions, while the other 6 were in other group quarters, such as college dormitories, group homes and military quarters (Map P5). The remaining 18,025 residents lived in households.
- d. **Housing Units by Type** – Of the 9,646 housing units in Taylor County at the time of the 2000 Census, 54.8% were single-family, 5.1% were multi-family, and the other 40.1% were mobile homes, boats, recreational vehicles (RVs) or others used as dwelling units. Of those units, 2,470 (25.6%) were vacant (Map H2).
- e. **Occupied Housing Units (Households)** – There were 7,176 occupied housing units (households) in Taylor County in 2000, 79.8% of which were occupied by owners and 20.2% by renters.
- f. **Household Size** – In 2000, the average household size (number of persons per occupied unit) in Taylor County was 2.51, which was above the State of Florida average of 2.46. Renters, who are mostly concentrated in multi-family units, had a higher household size (2.60) than owners (2.49), who are more heavily concentrated in single-family units.
- g. **Seasonal Dwelling Units** – In 2000 there were 1,489 vacant dwelling units in Taylor County that were for seasonal, recreational or occasional use (Map H1), representing 15.4% of all units. According to licensing records of the Florida Department of Business and Professional Regulation (DBPR), in 2007 there was 1 hotel with 60 rooms and 22 motels with 461 rooms in Taylor County. Together, these units house a seasonal population that is in addition to the permanent resident population estimated above
- h. **Vehicles per Household** – There were 788 Taylor County households in 2000 that had no vehicle (11.0%). This was higher than the average for the State of Florida as a whole (8.1%), and represents a significant number of households that could need transportation assistance in the event of a major evacuation. Households with a large number of vehicles were more concentrated in the urban core of the county in 2000 (Map H9).
- i. **Age Composition** – In 2000, the population of Taylor County included 2,649 people who were at least 65 years old, which represented 13.8% of the total population; this compared to 17.6% for the State of Florida as a whole. A little more than one fourth of these elderly residents (752) lived alone (Maps P6 and P7). Moreover, 357 residents (1.9% of the total) were at least 85 years old.
- j. **Race / Ethnicity** – The Hispanic or Latino population, which includes those born abroad as well as those born into Hispanic families in the United States, included 441 residents (2.3% of the total population) in 2000.

- k. **Place of Birth and Citizenship** – In 2000, 1.7% of Taylor County residents (319) were born abroad (Map P11). In addition, more than one fourth of the residents of Taylor County in 2000 (28.4%) were born in other parts of the United States. The remaining residents (69.1%) were born somewhere in the State of Florida.
- l. **Linguistic Isolation** – As a result of the growth in the diversity of the population in Taylor County, the level of linguistic isolation (households where no one 14 years or older speaks English “very well”) also is growing. In 2000, 23 households (0.3%) were classified as linguistically isolated (Map P9) – Spanish was spoken in 26.1% of these. Still, there were 17 linguistically isolated households in 2000 where a language other than Spanish was spoken (Map P8).
- m. **Labor Force** – In 2000, 48.1% of the population 16 years old and over of Taylor County was not in the labor force (Map P14); this was larger than the share of the inactive population in the State of Florida as a whole (41.3%).
- n. **Poverty Status** – There were 3,229 residents in 2000 that lived in households with incomes below the poverty level (18.0% of the total population). Poverty rates were highest among children (22.6%), but 17.9% of elderly residents also lived below the poverty level (Map P16). The poor elderly, especially those living alone, may represent a significant portion of those households without vehicles, which constitutes a substantial challenge for evacuation planning.

2. Small Area Dwelling Unit and Population Data

- a. Maps show the changes in housing units, households and population between the baseline in 2006 and the projection years of 2010 and 2015.

Taylor County Age Categories	Absolute Number			% of Total Population		
	2006	2010	2015	2006	2010	2015

² A housing unit is a house, an apartment, a mobile home, a group of rooms, or a single room occupied (or if vacant, intended for occupancy) as separate living quarters. Separate living quarters are those in which the occupants live separately from any other people in the building and that have direct access from the outside of the building or through a common hall. Both occupied and vacant housing units are included in the housing unit inventory. Boats, recreational vehicles (RVs), vans, tents, and the like are housing units only if they are occupied as someone's usual place of residence. Vacant mobile homes are included provided they are intended for occupancy on the site where they stand. Vacant mobile homes on dealers' lots, at the factory, or in storage yards are excluded from the housing inventory. Also excluded from the housing inventory are quarters being used entirely for nonresidential purposes, such as a store or an office, or quarters used for the storage of business supplies or inventory.

³ Tables H2a and H2b present the number of residents in the occupied housing units shown in Tables H1a and H1b for 2000 and 2006, respectively, by type of housing unit. They also show the average number of residents by type of housing unit, which can be used in transportation models to estimate the number of evacuating people.

Table H3a. Number of Vacant Units by Vacancy Status⁴, 2000		
Taylor County Vacancy Status	Vacant Units	%
For rent	236	9.55%
For sale only	223	9.03%
Rented or sold, not occupied	180	7.29%

⁴ Vacancy status and other characteristics of vacant units were determined by census enumerators obtaining information from landlords, owners, neighbors, rental agents, and others. Vacant units for seasonal, recreational, or occasional use are vacant units used or intended for use only in certain seasons, for weekends, or other occasional use throughout the year. Seasonal units include those used for summer or winter sports or recreation, such as beach cottages and hunting cabins. Seasonal units also may include quarters for such workers as herders and loggers. Interval ownership units, sometimes called shared-ownership or time-sharing condominiums, also are included in this category. Vacant migrant worker units include those intended for occupancy by migrant workers employed in farm work during the crop season. (Work in a cannery, a freezer plant, or a food-processing plant is not farm work.)

⁵ These data show the number of passenger cars, vans, and pickup or panel trucks of 1-ton capacity or less kept at home and available for the use of household members. Vehicles rented or leased for 1 month or more, company vehicles, and police and government vehicles are included if kept at home and used for non-business purposes. Dismantled or immobile vehicles are excluded. Vehicles kept at home but used only for business purposes also are excluded.

⁶ Race and ethnicity are separate categories in both the 2000 Census and the 2006 American Community Survey (ACS). For each person the surveys included two separate questions. The first asks whether each person in the household considers himself/herself to be of Hispanic or Latino origin (ethnicity). The second asks each person in the household to identify one or more racial categories that should be used to classify his/her racial makeup. Both questions request the respondent to classify himself/herself, rather than having a Census Bureau employee assign a classification. The tables presented here are cross-tabulations of the two characteristics. Race is tabulated into three categories: (1) White persons who identified only one race (White alone); (2) Black or African American persons who identified only one race (Black or African American alone); and (3) persons of other races who identified only one race (Other race alone) and those who identified two or more races, combined into a single category. For each race category, the totals were calculated for those who indicated that they were of Hispanic or Latino origin and those who indicated that they were not.

⁷ A household includes all of the people who occupy a housing unit. (People not living in households are classified as living in group quarters.) A family includes a householder and one or more other people living in the same household who are related to the householder by birth, marriage or adoption. All people in a household who are related to the householder are regarded as members of his or her family. A family household may contain people not related to the householder, but those people are not included as part of the householder's family in census tabulations. Not all households contain families since a household may be comprised of a group of unrelated people or of one person living alone (nonfamily households).

Table P4a. Resident Population by Place of Birth and Citizenship Status, 2000

Taylor County Place of Birth	Absolute Number	%
Native - Born in state of residence	13,302	69.08%

⁸ A household in which no person 14 years old and over speaks only English and no person 14 years old and over who speaks a language other than English speaks English "very well" is classified as "linguistically isolated." In other words, a household in which all members 14 years old and over speak a non-English language and also speak English less than "very well" (have difficulty with English) is "linguistically isolated." All the members of a linguistically isolated household are tabulated as linguistically isolated, including members under 14 years old who may speak only English.

⁹ The data on disability status were derived from answers to two long-form questionnaire items. The first was a two-part question that asked about the existence of the following long-lasting conditions: (a) blindness, deafness, or a severe vision or hearing impairment (sensory disability) and (b) a condition that substantially limits one or more basic physical activities, such as walking, climbing stairs, reaching, lifting, or carrying (physical disability). This question was asked of a sample of the population 5 years old and over. The second was a four-part question that asked if the individual had a physical, mental, or emotional condition lasting 6 months or more that made it difficult to perform certain activities. The four activity categories were: (a) learning, remembering, or concentrating (mental disability); (b) dressing, bathing, or getting around inside the home (self-care disability); (c) going outside the home alone to shop or visit a doctor's office (going outside the home disability); and (d) working at a job or business (employment disability). Categories (a) and (b) were asked of a sample of the population 5 years old and over; (c) and (d) were asked of a sample of the population 16 years old and over. For data products that use a disability status indicator, individuals were classified as having a disability if any of the following three conditions were true: (1) they were 5 years old and over and had a response of "yes" to a sensory, physical, mental or self-care disability; (2) they were 16 years old and over and had a response of "yes" to going outside the home disability; or (3) they were 16 to 64 years old and had a response of "yes" to employment disability.

¹⁰ In response to evidence suggesting that mail respondents reported certain disabilities in error in the 2000 Census and in the initial years of the ACS, the Census Bureau introduced changes to the ACS questionnaire starting in 2003. Initial review of the data shows that the question redesign had the expected effect on mail respondents, lowering the rates of disability overall by reducing over-reporting in go-outside-home disability and employment disability after the change. This change affected primarily the respondents in the age range from 16 to 64 years, and makes comparisons between results of the 2000 Census and the 2006 ACS inappropriate. The 2006 ACS is believed to have more reliable results.
